

# **EvalForward Talks:** How do you communicate difficult evaluation findings?

**Jennifer Mutua**

**Co-Ordinator of Project / Founder Evaluation Society  
of Kenya**

19<sup>th</sup> Feb 2021

# Joint Government/ESK - World Bank Pilot County Capacity Building & Rapid Evaluations Project

## Overall aims:

- ▶ Respond to the weak evaluation vis-à-vis monitoring capacity at devolved level
- ▶ Increase evaluation national demand/utility under the EvalSDGs agenda for promoting the evaluation of the SDGs and their alignment to national priorities under our Vision 2030

# Rapid Evaluations

- ▶ **Rapid Evaluations Purpose:** Aimed at the assessment of service delivery of health & water sector projects, respectively in Kericho & Kilifi Counties
- ▶ **One Key Objective:** Drawing lessons learned and recommendations for technical officers and policy makers to use towards improved service delivery & accountability

# Some challenging findings / 1

- ▶ **Sustainability/viability of some installations.**

E.g, some maternity wings/staff houses/ theatres constructed and not in use several years later. No personnel to offer services.

- ▶ **Incomplete implementation of some water projects.**

Concern by beneficiaries that despite completion of pipelines years ago these not yet connected to serve them.

# Kericho MCAs Evaluation Advocacy

# Some challenging findings /2

## ► **Low community participation**

Political/populist project prioritisation and identification devoid of being informed by evidence-based needs on the ground

## ► **Communities left out**

Aware of their Constitutional rights on public participation, communities felt largely left out in project identification/ implementation by technical officers. Technical staff in turn reported it's politicians' doing. Also that sometimes the citizenry do not turn up in good numbers for the public participation forums of related issues.

## ► **Gap in M&E**

Projects planned for Kericho health sector were in the form of activities and not "projects". M&E not applied from results dimensions, including from budgetary allocations.

# Kilifi County Data Collection - Observation

# Communicating Findings

## ► **Weak national practice & culture of M&E**

Against this backdrop preparations for communicating and buy-in of findings by counterparts/donors/decision makers started before and at all stages of the evaluation processes

**Significantly,** this resulted in the eventual buy-in of findings, despite the highlighted challenges below

# Challenges & solutions / 1

<b>Challenge</b>	<b>Possible Solution</b>
General fear of evaluation	<ul style="list-style-type: none"><li>• Sought national support</li></ul>
Low political goodwill for demand/utility	<ul style="list-style-type: none"><li>• Strategically undertook advocacy/demystification &amp; buy-in meetings before rapid evaluations targeting political leaders and technical officers at all levels</li></ul>
Low budgetary allocation to evaluation	

# Challenges & solutions /2

<b>Challenge</b>	<b>Possible Solution</b>
Limited common understanding of purpose and objectives for rapid evaluations	<ul style="list-style-type: none"><li data-bbox="942 444 1787 891">• Ensured transparency &amp; extensive stakeholder consultations for common understanding at all political &amp; technical levels &amp; throughout evaluation processes, that included field inception missions</li><li data-bbox="942 901 1787 1096">• Key message being that its for learning and improvement</li></ul>
	<ul style="list-style-type: none"><li data-bbox="942 1119 1787 1300">• Conducted trainings on rapid evaluations for technical officers for better understanding</li></ul>

# Challenges & solutions /3

<b>Challenge</b>	<b>Possible Solution</b>
Limited availability of some relevant desk review documentation especially on monitoring data towards accuracy/ completeness	<ul style="list-style-type: none"><li>• Comprehensive stakeholder participation contributed to triangulation of data sources in filling existing gaps: e.g, prior advocacy meets, inception/desk review field missions, primary data collection, on-line meetings, emails/phone calls communications with county evaluation coordinating teams</li><li>• Communication of findings at preliminary findings stakeholders validation workshops after primary data collection</li><li>• Shared draft reports for counterparts input/comments</li></ul>
Risk of lack of stakeholder buy-in of findings	

# Challenges & solutions /4

<b>Challenge</b>	<b>Possible Solution</b>
Long and highly technical academic-like reports that were hard to read/ understand by stakeholders including politicians and media variously raise concern	<ul style="list-style-type: none"><li>• Reference group ensures quality control of all processes towards making the reports more reader-friendly</li></ul>
Delays in dissemination stakeholder workshops owing to COVID-19 context	<ul style="list-style-type: none"><li>• Plans underway for production of different stakeholder-targeted reader-friendly versions (including short briefs for policy makers)</li><li>• With persistent unpredictability, finally remote online option agreed upon</li></ul>

# Kericho Rapid Evaluation Training for Technical Officers

# Discussion

- ▶ Which **challenges** are you facing in communicating the evaluation results and ensuring understanding?
- ▶ What **tools and actions** are helping you?
- ▶ Are the approaches different in communicating with donors, commissioners, project teams, communities? ....
